PERSONAL SUMMARY

Experienced software developer with 6 years of expertise in creating innovative applications that enhance organizational efficiency and effectiveness. Well-versed in technology and writing code to create systems that are reliable and user-friendly. Proficient in all phases of the software development lifecycle, ensuring quality solutions that align with business objectives. Skilled team player who has the proven ability to motivate, educate, and manage a team of professionals to build software programs and effectively track changes.

SKILLS

- **Front-end Technologies:** HTML5, CSS3 (LESS, SASS, Tailwind & Bootstrap), JavaScript, jQuery, React.js and Alpine.js
- **Back-end Technologies:** PHP and Node.js
- **Stacks:** LAMP (Linux, Apache, MySQL, PHP) & MERN (MongoDB, Express.js, React.js, Node.js)
- **CMS:** Magento 2 and WordPress
- **API:** REST APIs, JSON, and XML
- **Databases:** MySQL and NoSQL (MongoDB & Firebase)
- **VCS:** Git Lab, GitHub, Azure Repos and Bitbucket
- **Methodologies:** Agile/Scrum
- **Testing:** A/B, unit & manual testing, and Q/A (BrowserStack)
- **Cloud Computing:** Google Cloud, Microsoft Azure and Amazon AWS
- **Graphic Design:** Adobe Photoshop, Illustrator and Figma
- **Web Accessibility:** Experienced in developing digital solutions that comply with WCAG 2.0

EXPERIENCE

Aonach, Kenmare Kerry (remote work)

July 2020 - Present

Software Developer

- Design, test, and launch a scalable, highly available, and modular eCommerce application using the Magento 2 framework.
- Utilize front-end technologies such as HTML5, CSS3 (Less, SASS & Tailwind), JavaScript, jQuery, React.js, Hyva themes to enhance user interfaces.
- Employ back-end using PHP 8 for robust server-side functionality, building modules and extensions.
- Integrate RESTful APIs to streamline data exchange and improve application performance.
- Collaborate using GitHub for version control, ensuring efficient code sharing and review processes.
- Conduct quality assurance testing with BrowserStack to ensure cross-browser compatibility.
- Operate within an Agile/Scrum environment to promote iterative development and continuous improvement.

Loadlink Technology, Mississauga Canada

August 2019 – June 2020

Software Developer – Project Lead

- Led the development, testing, and deployment of a scalable, highly available, and modular eCommerce application using the Magento 2 framework.
- Initiated project requirements and distributed tasks among the team using Jira issue tracking tool.
- Managed a team of four, participating in the initial interview process for potential hires.
- Trained and supported team members across various tech stacks throughout the project lifecycle.

- Contributed to other company projects utilizing the MERN stack (MongoDB, Express, React & Node.js).
- Utilized front-end technologies including HTML5, CSS3, JavaScript, jQuery, React, and Redux.
- Employed back-end technologies such as PHP 7 and Node.js.
- Developed and integrated RESTful APIs.
- Collaborated and conducted code reviews using Bitbucket for version control.

Flight Safety, Toronto Canada

April 2019 – July 2019

Software Developer

- Created an aviation eLearning site using PHP with the Laravel framework for server-side programming.
- Developed an eLearning commerce site with the Magento 1.9 framework.
- Utilized front-end technologies including HTML5, CSS3, JavaScript, jQuery, and React.js.
- Managed databases with MySQL in conjunction with the Magento framework.
- Collaborated and reviewed code using version control systems such as TFS and GitLab.
- Operated in an Agile/Scrum environment.
- Conducted quality assurance and A/B testing.

Apostrophe Solutions Corp, Toronto Canada,

August 2018 – April 2019

Software Developer

- Designed, tested, and deployed scalable, highly available, and modular web applications using ASP.NET combined with HTML5, CSS3, and JavaScript (jQuery).
- Operated within an Agile/Scrum environment.
- Contributed to the development, testing, and debugging of Remarketer, a cloud platform for real estate marketing.
- Utilized Azure DevOps for work tracking and issue management.
- Collaborated on code sharing and review using Azure Repos for version control.
- Integrated third-party applications for data retrieval via RESTful APIs.
- Conducted quality assurance and A/B testing.
- Created logos and banners for websites using Adobe Photoshop and Adobe Illustrator.
- Designed and developed digital solutions in compliance with WCAG 2.0 under the Accessibility for Ontarians with Disabilities Act (AODA).

EDUCATION

Dublin City University

September 2016 – May 2020

Bachelor of Science in Information Technology, Degree. Qualification: Second Class Honors 2.1

Relevant course work: **Back-end:** PHP and Object-Oriented Programming with Java. **Database:** MySQL NoSQL (MongoDB) and Firebase cloud storage and real-time database. **Front-end:** HTML5, CSS3 and JavaScript. Android Mobile Application Development with Android Studio using Java Marshmallow API 23 and Firebase Cloud. **Other modules:** Communications Device Theory and Design, User Experience Design, Mathematical and Statistical Methods, Innovation, and entrepreneurship.
